

Category (科目区分)	Research subject		
Course Title (授業科目名)	Biochemistry		
Instructors (担当者名)		Academic Year (配当年次)	2,3
Required Course / Elective Course (必修/選択)	Elective Course	Credits (単位数)	15
Class Format (授業形態)	Lecture & Practice		
Schedule (開講期間)	(R5 Cancellation of classes) Students will be notified by email after completing the course registration.		
Class Date/Period (開講曜日・時間)	(R5 Cancellation of classes) Students will be notified by email after completing the course registration.		
Course Outline/ Course Objectives (授業の概要・到達目標) Purpose of class: The purpose of the class is to deepen the understanding of the pathophysiology of diseases and the mechanism of physiological phenomena by clarifying biological phenomena at the molecular and cellular levels. Achievement goal of the class: Conduct research activities on research themes such as cardiovascular disease, inflammatory disease, and malignant tumor, and elucidate the mechanism of disease pathology and physiological phenomena at the molecular and cellular levels. The goal is to obtain a doctor's degree after publishing the prepared paper in a leading overseas academic journal and undergoing a degree examination. Class outline: 1. Learn the latest findings through literature abstracts on RNA regulation and signal transduction in pathological conditions, and teach how to formulate and prove working hypotheses when starting research. 2. Guide to acquire the latest technologies in biochemistry / molecular biology, cell biology, experimental zoology, reproductive engineering, and bioinformatics, which are essential for RNA control and analysis of signal transduction, and to analyze and aggregate the obtained data. At the same time, we will teach you how to put these into an academic paper

Coment (その他特記事項)			
Information about the course: If you are a working graduate student and cannot attend the practical training due to work, we will adjust the schedule. Textbooks and reference materials: Materials will be distributed as necessary. Content of study during self-study time: It is desirable to conduct preparatory study according to the objectives and class content.
