<b>Course Outline/ Course Objectives</b> (授業の概要・到達目標) Purpose of the class: The purpose of the class is to learn the technical knowledge and skills related to experiments and academic meetings, and thesis writing, which are necessary to proceed research. Achievement goal of class: After publishing the paper in an academic journal, the goal is to obtain a degree after undergoing a degree examination. Class outline: Investigate the new role of stromal cells that consist tumors. We will explore the functions of stromal cells that support cancer cells and their molecular mechanisms, and create tools that target them. By investigating the formation of these stromal cells that promote cancer progression and the mechanism of their development, we aim for new cancer treatments.
