### 3. Course Description Outline(Course Objectives)

#### 1. Outline

Students who are interested in a more in-depth exposure to pediatric surgery may complete a six-week rotation in the Division of Pediatric Surgery. During this time, they not only participate in the clinical activities afforded to forth-year medical students, but also gain more experience in both the outpatient clinic and the operating room. In addition, they are given more responsibility and will attend all academic functions in the Division of Pediatric Surgery.

#### 2. Learning objectives

Learning objectives of this course is to understand and integrate the major themes of pediatric surgery.

It includes the most common pathologies (hernias, hydroceles, pyloric stenosis, undescended testis, umbilical hernia, appendicitis, etc. ), neonatal surgery for congenital malformations(esophageal atresia, diaphragmatic hernia, malrotation, gastroschisis, intestinal atresia, Hirschsprung's disease, anorectal malformation, etc. ), pediatric surgical oncology.

This subject is a lesson subject by a teacher with practical experience.
