本科目は実務経験のある教員による授業科目です。

#### 1. Class outline and aim

Learn experientially about outpatient and ward medical care, and deepen understanding of diagnostic approaches to otolaryngological diseases, actual treatment methods, and collaboration with other departments. In outpatient training, we practice with the instructor in charge and learn how to treat patients by observing how they speak and how they react (medical ethology). Through practical training, understand respect for patient decision-making, safety, and patient benefits and burdens (medical ethics).

This subject is a lesson subject by a teacher with practical experience.
